Additional Information: full citation, abstract, references, index terms

window

This paper presents an integrated system for bioceramic implant modeling and printing. To actualize the concept of "Made-to-order implants - customized body parts", Spline based volumetric modeling, new approaches and applications of volumetric modeling and Rapid Prototyping in medical implant, is effective in constructing/reconstructing the normal and defective bone structures and to interface the constructed/reconstructed medical models for rapid prototyping. The feasibility of using the 3DP t ...

**Keywords**: bioceramic, biocomposite implant, spline-based volumetric modeling, three-dimensional printing

<sup>2</sup> Computer-generated watercolor

Cassidy J. Curtis, Sean E. Anderson, Joshua E. Seims, Kurt W. Fleischer, David H. Salesin August 1997 Proceedings of the 24th annual conference on Computer graphics and interactive techniques

Publisher: ACM Press/Addison-Wesley Publishing Co.

Full text available: The pdf(1.84 MB) Additional Information: full citation, references, citings, index terms

3 Parallel iterations and cellular automata models for simulating pore structural

transformations

P. Markenscoff, K. Zygourakis

April 1991 Proceedings of the 19th annual conference on Computer Science

**Publisher: ACM Press** 

Full text available: pdf(857.55 KB) Additional Information: full citation, references

4	SPICE: Simulated Pore Interactive Computing Environment  Shantenu Jha, Peter Coveney, Matt Harvey  November 2005 Proceedings of the 2005 ACM/IEEE conference on Supercomputing SC  '05  Publisher: IEEE Computer Society  Full text available: pdf(480.08 KB) Additional Information: full citation, abstract
	SPICE aims to understand the vital process of translocation of biomolecules across protein pores by computing the free energy profile of the translocating biomolecule along the vertical axis of the pore. Without significant advances at the algorithmic, computing and analysis levels, understanding problems of this size and complexity will remain beyond the scope of computational science for the foreseeable future. A novel algorithmic advance is provided by a combination of Steered Molecular Dynam
5	Simulation modeling of an automated system for electrostatic powder coating Vlatka Hlupic, Ray J. Paul December 1993 Proceedings of the 25th conference on Winter simulation Publisher: ACM Press Full text available: pdf(564.80 KB) Additional Information: full citation, references, citings
